

SUVO Wax Coat

Anti corrosive waxy coating

SUVO Wax Coat is thixotropic and forms after drying a light brown, elastic and waxy surface that does not feel tacky or smeary. In addition, it provides a certain mechanical protection.

Range of application:

SUVO Wax Coat is very effective long term rust protection, especially designed for the protection of machines, machine parts, beams etc. during storage.

Package

01-502 / 25-lit can
01-501 / 60-lit drum
01-500 / 208-lit drum

Instructions for use:

SUVO Wax Coat may be applied by high- or low-pressure spraying, dipping or brushing. If necessary, it may be diluted with a small quantity of non-aromatic white spirit.

Technical data	
Color:	Light brown
Consistency:	Thixotropic
Type of film:	Vaxy
Density at 20°:	900 ± 20 kg/m ³
Dry content:	65 ± 3 %
Solvents:	D40
Film thickness:	Approx. 40 µm
Application temperature:	15 – 35 ° C
Removal with:	Clairsolrens, Clearrens or LHG Rensevæske
Storing temperature:	5 – 35 ° C

For further information we recommend the safety data sheet or instruction on package.
