

Non Nafta Nox 720 Remover

Degreaser

Degreasing product for the removal of Non Nafta. And other sorts of oil/degrease products.

Range of application:

Non Nafta Nox 720 Remover is a degreasing product used for the removal of Non Nafta prior to further production and assembly. The remover can also be used to degrease steel components from oil and grease before applying Non Nafta.

Instructions for use:

Apply undiluted with a brush or spray bottle. After a reaction time of approximately 3–5 minutes, scrub the surface and wipe it off with a cloth or

paper. For a completely clean and grease-free surface, the treatment may be repeated.
