

SUVO 216

Anti-rust product

SUVO 216 is a drip-free rust protection product with light bronze pigmentation.

Range of application:

The product is intended for underbody coating and in wheel arches before applying the wear layer. Its anti-corrosive properties and excellent penetration provide an ideal base for the wear layer application.

Package

01-082 / 25-lit can
01-081 / 60-lit drum
01-080 / 208-lit drum
01-079 / 1000-lit tank

Instructions for use:

Apply the product in an appropriate amount using suitable high-pressure equipment.
NOTE: SUVO 216 should not be used in rusty areas without prior priming with the specialized product Rust Stop 150-d.
